June 22, 2009

Director, Family and MWR

Dear Parents and Students,

Starting in the 2009-2010 school year, Fort Bragg, Family and MWR will begin providing *free* after school transportation for 9th grade Albritton Junior High School Students and current E.E. Smith High School students residing on Fort Bragg. Students will be transported *to* and *from* after school activities such as tutoring, sports and other extra-curricular activities. The after school bus transportation will be provided by Fort Bragg Child, Youth and School Services (CYSS). All students must be registered with CYSS to receive transportation and registration is free.

This initiative is a direct result of Fort Bragg's and E.E. Smith's continuing partnership to maximize education enrichment and academic success for Fort Bragg's High School Students attending E.E. Smith. This will provide students a safe and reliable method of transportation to increase participation in the programs and services offered after school, and give students greater opportunities to become involved with E.E. Smith's activities and functions and to enjoy the superb after school programs and services of the Tolson Youth Activity Center.

The pickup and drop off point will be at the Tolson Center on Fort Bragg. Albritton students will have to meet at Tolson after school to be transported to E.E. Smith. Parents will be responsible for picking students up from Tolson and heaven forbid for any students who miss the bus. The following is our planned schedule for transportation:

- a. Pick up from Tolson YAC to E.E. Smith High School: 3:40 p.m.
- b. First pick up from E.E. Smith High School to Tolson YAC: 5:00 p.m.
- c. Second pick up from E.E. Smith High School to Tolson YAC: 6:30 p.m.

We would like to know of your interest in this service, and your children's likelihood of using it, please e-mail your input, contact information, and any questions to [braggschoolliason@conus.army.mil](mailto:braggschoolliason@conus.army.mil).

Sincerely,

DANIEL J. AHERN  
Director,  
Family and MWR
